Rigging plates are indispensable and help make setting up a rope system quicker and safer. SMC's Rigging Plate is half the size of the bigger plates on the market yet it is just as strong. Features a single, large circular center hole that accepts numerous connections simultaneously plus five oversized, ovalized holes that are each designed to handle up to 2 large rescue carabiners. Holes are individually numbered to make it quick and easy to organize connections. All edges on the SMC Rigging Plate have been contoured so that they are easy on rope, webbing, carabiners and other connectors. CNC machined from 1/2" thick high quality aluminum and then anodized for quick identification and additional resistance to corrosion.

#### SPECIFICATIONS

<b>Model:</b>	<b>NFPA130005</b>
<b>Material:</b>	High quality aluminum
<b>Finish:</b>	Anodized Red
<b>Dimensions:</b>	7" x 5.3" x 0.5"
<b>Weight:</b>	11.4 oz (323.2 g)
<b>3 Sigma MBS:</b>	11,690 lbf (52kN)

#### Certified by Underwriter's Laboratories to exceed the NFPA 1983 (2006 edition) "G" - General Use requirement of 36kN.
