## Rescue Technician Gloves (RTG)

These new Rescue Technician Gloves (RTG) from PMI are certified as a utility ensemble element per NFPA 1951, 2007. The PMI RTG provides protection from physical hazards, a basic flame resistance for the hands, and a high level of breathability to reduce heat stress for the wearer. They are intended to be used by fire and emergency services personnel operating at technical rescue incidents involving building or structural collapse, flash fire\*, vehicle/person extrication, confined space entry, trench/cave-in rescue, rope rescue and similar incidents.
